

# TeleCraft™

---

Installation and Programming Note:  
**Addendum: KSU software version 062**  
Document version 1.0

**Features:**

This version adds the following:

1. It allows for simultaneous ringing of up to 8 phones instead of 4 phones.
2. Caller ID is now sent to all of the phones in the hunt group. Thus up to 8 phones may receive it.
3. It eliminates possible false ringing when a call is terminated.
4. The "PBX Hold" timing is improved.

**How to ring 8 phones:**

TeleCraft can ring up to 8 phones as follows:

- a. List these phones in Hunt Groups 0 and 6.
- b. Set both Hunt Groups' mode to Broadcast.

Now, dialing "0" will ring the phones in both Hunt Groups but dialing "6" will ring the phones in Hunt Group 6 only.

**IMPORTANT NOTE:** When you need to ring 4 phones or less, list them in Hunt Group 0 and set Hunt Group 6 to "ring 1<sup>st</sup> phone"

**Software needed:**

KSU software version 062 or newer and any voice mail version.
